Comparing and Ordering Numbers

1. Write the value of the digit 2 in these numbers:

345 214

920 444

12 889

2. Write the value of 3 in these numbers:

234 125

368 056

42 893

3. Put an X on the numbers in which the value of 4 is 400 000

324 007

423 720

322 427

450 000

849 000

4. Put an X on the numbers in which the value of 3 is 30 000

325 007

430 251

124 335

230 001

999 030

5. Put an X on the numbers in which the value of 4 is 4 000

124 321

240 089

421 432

554 510

813 470

Solve by adding or subtracting

5. 346583

+489361

6. 578101

-194129

909259

-255629

754629

-298374

466734

-372741

Sherry loves to travel. On her birthday, she decided to go on a trip on a mysterious continent.

Her first destination was in an island of statues which is 436 miles from her place. She took a plane that made two stopovers, the first stopover after covering 132 miles and the second stopover after another 236 miles. How much farther is the island from the second stopover?
