

Distributivité

Applique la distributivité :

1) $20 \times (10 + 5) =$

$$\begin{aligned} & 20 \times \underline{\hspace{2cm}} + 20 \times \underline{\hspace{2cm}} \\ & \underline{\hspace{2cm}} + 100 \\ & = \underline{\hspace{2cm}} \end{aligned}$$

2) $300 \times (20 - 3) =$

$$\begin{aligned} & 300 \times \underline{\hspace{2cm}} - 300 \times \underline{\hspace{2cm}} \\ & 6000 - \underline{\hspace{2cm}} \\ & = \underline{\hspace{2cm}} \end{aligned}$$

3) $25 \times (4 + 2) =$

$$\begin{aligned} & \underline{\hspace{2cm}} \times \underline{\hspace{2cm}} + \underline{\hspace{2cm}} \times \underline{\hspace{2cm}} \\ & \underline{\hspace{2cm}} + \underline{\hspace{2cm}} \\ & = \underline{\hspace{2cm}} \end{aligned}$$
