

Cell membrane Active and Passive Transport

1. Click on each substance in the box in the upper right corner. Watch and describe how each move across the plasma membrane.

a. Oxygen:

b. Carbon Dioxide:

c. Glucose:

d. Potassium:

e. Sodium:

f. Water:

g. Enzyme:

2. The cell must use energy to move certain substances across the plasma membrane. Which of the above substances require energy to be transported?
