

Hello, good morning guys! How are you today?
Today we are going to see the page 37. The title is SYMMETRY.
An axis of symmetry divides an object into two equal parts.
In the first page, you can see some pieces of fruit.
Fruit gives our bodies water, vitamins, minerals and fibre. Fruit helps our bodies to function correctly.
The task for this week is to draw and colour the fruit so that both halves are the same.
After this, you have to take the photocopy that I have given you previous day and try drawing these things at the back.
You only need to use your pencil, coloured pencils, scissors and glue.
Bye, bye. See you in class.
