Program: Dentistry
Class: Pediatric Dentistry

INFORMATION GAP ACTIVITY

SPEAKING ACTIVITY

Content aim:

Students will be able to identify and contrast the difference between some oral health measures for children and adults.

Language aim:

Students will be able to formulate questions properly and speak in pairs in order to organize the given information.

Purpose of the activity: students will have to complete the missing information in each paper through asking her/his partner about it.

Instructions:

1. Let's watch the following example of this activity (minutes 1:15 to 3:15):
2. Get in pairs.
3. One student will have paper number 1, and the other will have paper number 2.
4. To complete the information in each paper, students will have to ask their partners.
5. After the information is completed, each pair will share the answers with the class.

Student No. 1	Student No. 2
