4	The school generates electricity for the city.	YES	NO
5	They take glass and plastic to the city.	YES	NO
6	The wind is a natural resource.	YES	NO

A Green School

I go to a Green School! It's a rural school in the Province of Buenos Aires, Argentina. We produce energy from a natural resource: the wind. We've got an eolic wind turbine. It generates electricity for the school. We've got a science project at school. We pick up litter and we classify glass and plastic. We take the glass and plastic to the city and we recycle the materials. At school we help save our planet!
