

Name _____

Date _____

A food web is made of several interconnected food chains. A food web also shows the flow of energy from one organism to another.

1. List the different food chains that are presented in the food web. (Example: Tree → Deer → Mountain Lion)
2. What vocabulary term learned in class best describes the grass in this food web?

3. What vocab term learned in class best describes the meerkat?

4. What vocab term learned in class best describes the buzzard?

5. How many different trophic levels exist in this food web?

Bonus: Identify the following organisms by colors indicated. (Note: Some colors will not be used)

Green- Producers	Purple- Tertiary Consumers
Blue- Primary Consumers	Red- Secondary Consumers
Yellow- Decomposers
