Parque Luro Reserve

This is Parque Luro. It is a natural reserve near Santa Rosa, the capital city of La Pampa. This reserve is 35 kilometres to the south, between the cities of Santa Rosa and Ataliva Roca and has got 7.607 hectares of extension.

In Parque Luro, there are several animal species. Some are native and others are exotic. In the reserve, you can see red deers, foxes, pumas and different bird species, among others.

We can also see several vegetal species, for example caldén, molle, piquillín and chilladora.

There are some paths you can walk to know the different ecosystems.

In the reserve, we can visit historic buildings. There is a castle and other places, for example a stable, a carriage room, a tambo and a million-litre tank.
