

OPERACIONES COMBINADAS

Lee la siguiente situación y resuelve la operación:

El día domingo compramos 8 helados para la familia, en el camino 4 se derritieron. Por ello, mi mamá salió a comprar 9 helados más ¿Con cuántos helados nos quedamos al final?

A resolver:

a) $9 + 4 - 2$

A diagram showing the calculation of $9 + 4 - 2$. The expression is written above three boxes. The first two boxes are grouped by a bracket pointing down to a box. The third box has an arrow pointing down to a box. These two boxes (the result of the first two and the result of the third) are grouped by a bracket pointing down to a final box.

$10 - 5 + 6$

A diagram showing the calculation of $10 - 5 + 6$. The expression is written above three boxes. The first two boxes are grouped by a bracket pointing down to a box. The third box has an arrow pointing down to a box. These two boxes (the result of the first two and the result of the third) are grouped by a bracket pointing down to a final box.
