

# LAN , WAN, INTERNET?

Network	LAN, WAN or the Internet?
 <p>Diagram illustrating a Local Area Network (LAN) setup. Five devices are connected to a central Ethernet hub: an IBM Compatible desktop, an iMac, a Server, a Laptop computer, and another IBM Compatible desktop. The devices are represented by icons: a CRT monitor with a keyboard for the desktops, a CRT monitor with a keyboard for the iMac, a server rack for the Server, a laptop for the Laptop computer, and another CRT monitor with a keyboard for the second desktop.</p>	
<p>This type of network lets your teacher save their Computer Science files to OneDrive.</p>	
 <p>Diagram illustrating a Wide Area Network (WAN) setup. Two computers are connected to a central globe representing the world, symbolizing global connectivity. The globe is blue and green, representing the Earth, with network lines connecting the two computers to it.</p>	
<p>Cash machines throughout the UAE for a bank are connected to this network.</p>	
<p>You can play an online game against someone in Mexico using this type of network.</p>
