2. Sing and dance the song about the water cycle. Then, look at the picture and number from 1 to 5.

_____ Water moves. It reaches lakes, rivers and the sea as a liquid. This is called accumulation.

_____ Liquid water becomes vapour due to the heat from the Sun. This is called evaporation.

_____ Water droplets in clouds become heavy. They fall as rain, snow or hail. This is called precipitation.

_____ The Sun heats the ocean.

_____ Water vapor cools and forms clouds. This is called condensation.

3. Write the three states of water and an example of each.

For instance: ___Vapour_____:.....clouds.....

_____: .....

_____: .....

_____:.....
