Final TEST

14.Dec.2018

Name:

Surname:

- **Drag and drop the correct answer**

sensor

Device that tell you what happen	**LED**
Reduce resistance as light increases	**actuator**
Able to read inputs and turn it into output	**Arduino board**
A device that converts energy in environment	**LDRs**

- **Join the correct answer by arrow**

1

push button

2 
330 Resistor

3

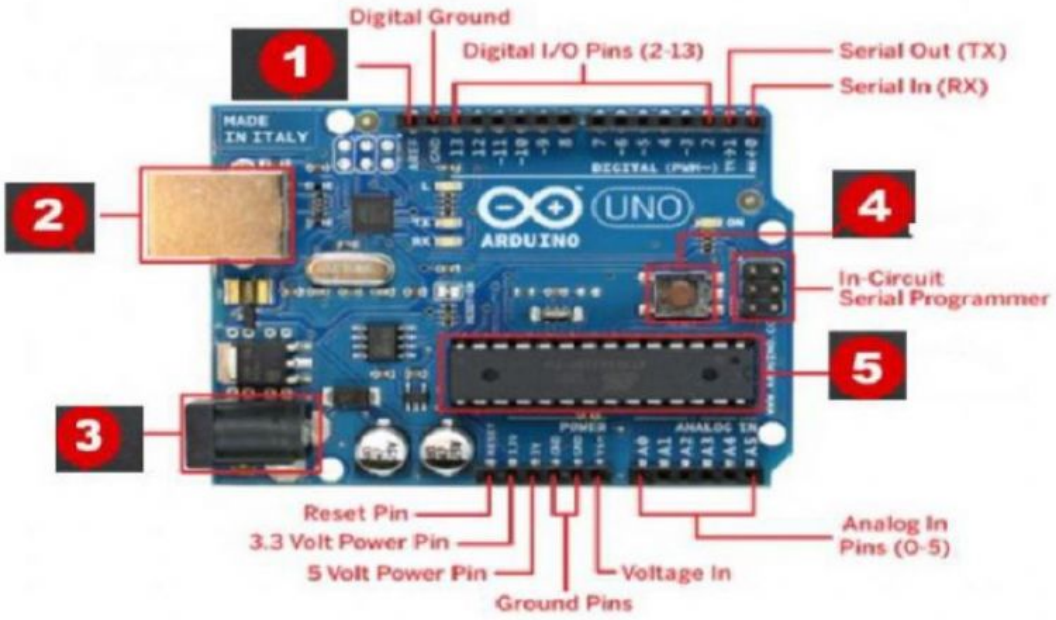
Integrated Development Environment

liveworksheets.com

4 110 Resistor

5 The software used to create Arduino sketches Light Emitting Diod

- **Join correct answer by arrow**



…… ATmega 328 Microcontroller

…… External power supply

…… USB plug

…… Analog reference pin

…….. Reset button
