

Simplify:

Fraction of an amount -
Finding the Whole

Steps to follow

Step 1: Divide the whole with the given fraction

Step 2: Remember to Keep Change Flip

Step 3: Simplify

Remember that in Maths
of means multiply

1) $\frac{1}{2}$ of = 6

6) $\frac{1}{3}$ of = 9

2) $\frac{1}{4}$ of = 10

7) $\frac{1}{2}$ of = 30

3) $\frac{1}{3}$ of = 8

8) $\frac{3}{4}$ of = 36

4) $\frac{1}{6}$ of = 11

9) $\frac{2}{3}$ of = 60

5) $\frac{1}{4}$ of = 5

10) $\frac{11}{12}$ of = 88
