

Hello, good morning! Are you fine today?

Today we are going to see a photocopy that I've prepared for you.

This is about lines. We are going to use some types of lines to draw different pictures.

There are 3 types of lines: horizontal, vertical and diagonal lines.

In the photocopy you can see these three types of lines.

The task for this week is to trace the lines, but you have to do it carefully. You can use a ruler.

After this, you have to colour the drawing with primary and secondary colours.

When you finish colouring, at the back, you have to draw (with lines and dots) another drawing.

Maybe you can draw a sun, a butterfly, an animal or something that you want to do.

You only need to use your pencil, coloured pencils, ruler and your imagination.

Goodbye. See you in class.
