

تحليل العدد إلى عوامله الأولية

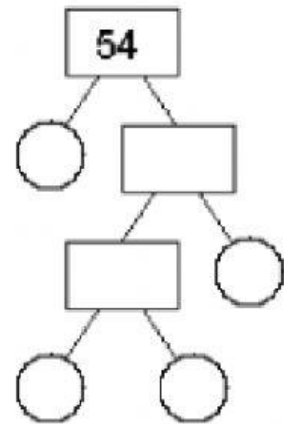

1)

2)

3)

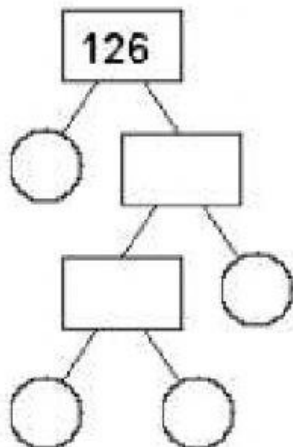

$$\underline{\quad} \times \underline{\quad} \times \underline{\quad} = 88$$

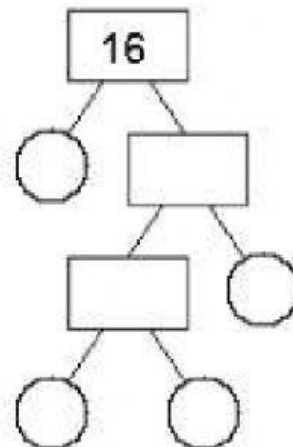

$$\underline{\quad} \times \underline{\quad} \times \underline{\quad} \times \underline{\quad} \times \underline{\quad} = 48$$

$$\underline{\quad} \times \underline{\quad} \times \underline{\quad} \times \underline{\quad} = 54$$

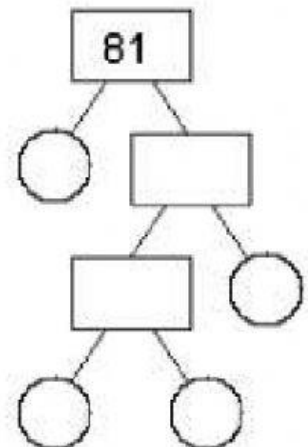

4)

5)

6)

$$\underline{\quad} \times \underline{\quad} \times \underline{\quad} \times \underline{\quad} = 126$$

$$\underline{\quad} \times \underline{\quad} \times \underline{\quad} \times \underline{\quad} = 16$$

$$\underline{\quad} \times \underline{\quad} \times \underline{\quad} \times \underline{\quad} = 81$$
