

|                                   |  |                                                                                     |                                                                                    |
|-----------------------------------|--|-------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|
| <b>Liver</b>                      |  |    | This is where oxygen gets into the blood.<br>Carbon dioxide leaves the blood here. |
| <b>Lungs</b>                      |  |    | This control most of the things your body can do.                                  |
| <b>Small and large intestines</b> |  |    | This pumps blood to all parts of the body.                                         |
| <b>Heart</b>                      |  |   | This organ removes toxins from the blood                                           |
| <b>Brain</b>                      |  |  | These help the body to get rid of waste substances.<br>They make urine.            |
| <b>Kidneys</b>                    |  |  | It starts to break down food.                                                      |
| <b>Stomach</b>                    |  |  | This is where the body absorbs food and water into the blood.                      |
