## Chapter 3 – Understand Multiplication and Division

### Lesson 1 Vocabulary Glossary ( Gr 4 B)

#### *Relate Multiplication and Division*

Use the three-column chart to complete the vocabulary definitions in this lesson.

| Word            | Definition                                    | Visual                                                                                |
|-----------------|-----------------------------------------------|---------------------------------------------------------------------------------------|
| <b>Divide</b>   | to ----- into equal groups                    |  |
| <b>Dividend</b> | A number that is being -----.                 |  |
| <b>Divisor</b>  | The number by which the ----- is being -----. |  |
| <b>Quotient</b> | The answer to a ----- problem                 |  |

|                          |                                                                                   |                                                                                                 |
|--------------------------|-----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|
| <b>Multiply</b>          | to ----- a number to itself a certain number of times                             | $\begin{array}{c} \downarrow \\ 2 \times 3 = 6 \end{array}$                                     |
| <b>factor</b>            | A number that is -----<br>-- to get another number.                               | $\begin{array}{cc} \downarrow & \downarrow \\ 2 & \times 3 = 6 \end{array}$                     |
| <b>product</b>           | The -----<br>when two or more numbers are multiplied.                             | $2 \times 3 = \begin{array}{c} \downarrow \\ 6 \end{array}$                                     |
| <b>Fact family</b>       | A group<br>of -----<br>facts using the same numbers .                             | $\begin{array}{l} 2 \times 3 = 6 \\ 3 \times 2 = 6 \\ 6 \div 3 = 2 \\ 6 \div 2 = 3 \end{array}$ |
| <b>Inverse operation</b> | The -----<br>operation<br>(addition,<br>subtraction,<br>multiplication, division) | $\begin{array}{l} 2 \times 3 = 6 \\ 6 \div 3 = 2 \end{array}$                                   |
