Calculate the Range of a Data Set

 Month	 Total Rainfall (Inches)
March	1
April	2
May	1
June	2
July	2
August	8

Find the range of the data for total rainfall by month:

Step 1 – Put the numbers in order from lowest to highest.

_____, _____, _____, _____, _____, _____

Step 2 – Subtract the smallest number (lowest) from the largest number (highest) to find the range.

_____ - _____ = _____

The range for this data set is _____.

Favorite Sports	
Baseball	9
Basketball	6
Tennis	8
Soccer	5
Swimming	2

Find the range of the data for “Favorite Sports”:

Step 1 – Put the numbers in order from lowest to highest.

_____, _____, _____, _____, _____

Step 2 – Subtract the smallest number (lowest) from the largest number (highest) to find the range.

_____ - _____ = _____

The range for this data set is _____.
