What's it made of?
Where is it found?
How many strands?
What are the nitrogenous bases?
What's its job?

DNA

RNA

Similarities

COMPARATIVE ESSAY

Now, you will take the information collected above and put it into a short essay. A suggestion would be to construct two paragraphs, one with the similarities of DNA & RNA and a second paragraph with the differences. I'll help you get started:

I am comparing and contrasting DNA and RNA. Although ___ and ___ are different, they are alike in some ways. For example, ___ and ___ are both ____.

This image shows a full page of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page, providing a template for handwriting practice. There are no margins, text, or other markings on the page.
