7. READ THE TEXT.

BAGS

Plastic bags that get thrown out end up (a)**somewhere in the environment**. These can suffocate animals who get stuck in them or may mistake them for food. Also, it takes a while for the bags to decompose. Whenever you go shopping use a reusable bag. This (b)**cuts down on litter and prevents animals from getting a hold of them**. There are even some shops (such as Target) that offer discounts for using reusable bags. These bags are useful for other things as well. I have heard of (c)**people using reusable bags when they move**. If you forget your reusable bags at home, buy a new one. It is better if you keep a couple of such bags in your car so you never leave home without them. If you are in a position where you need to use the plastic bags, it is better to reuse them the next time you go shopping, or use them for something else. Just do not throw them away so quickly. Since 1st January European shops (d)**have had to charge extra for using plastic bags**. Using reusable bags helps the environment and your budget.
