3. Choose the correct answers to complete the text.

KEEP IT SIMPLE

Peter G. Neumann, an 80-year-old computer scientist, still remembers the advice he **has got / gets / got** from the famous physicist Albert Einstein in 1952.

Einstein said that everything should **make / could make / should be made** as simple as possible, but no simpler.

Today, Neumann is **still guided / still guides / was still guided** by this principle.

He thinks that computer design **become / has become / becomes** too complicated and that, as a result, it is getting harder to repair computers when they **broke down / will break down / break down**. More importantly, when they **attacked / were attacked / are attacked** by computer viruses, the results can be very serious. The U.S. government is extremely worried about this problem, so it **hires / has hired / is hired** Neumann and a team of researchers to find solutions. Neumann believes that computer networks need **design / to design / to be designed** differently to make them safer.

He plans **to review / reviewing / review** computer research from the last fifty years, choose the best ideas and then build something new together with his team. When Neumann **begin / has begun / began** talking about computer security more than fifty years ago, very few people were listening. Today, all eyes are on him.
