

Scrivi sui lati dei poligoni tutte le misure mancanti, poi calcola le aree e i perimetri dei rettangoli e dei quadrati.

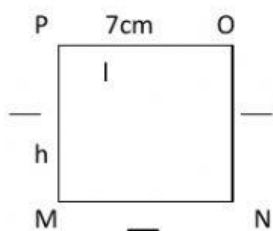

$$A = l \times l = 9 \times 9 = 81 \text{ cm}^2$$

$$P = l \times 4 = 9 \times 4 = 36 \text{ cm}$$

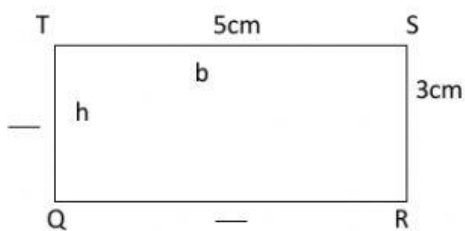

$$A = \quad = \quad = \text{ cm}^2$$

$$P = \quad = \quad = \text{ cm}$$

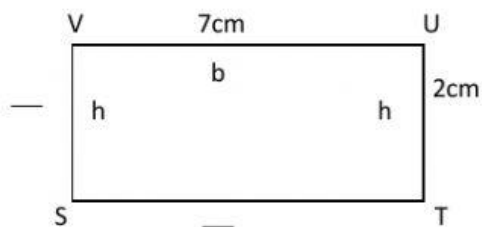

$$A = \quad = \quad = \text{ cm}^2$$

$$P = \quad = \quad = \text{ cm}$$

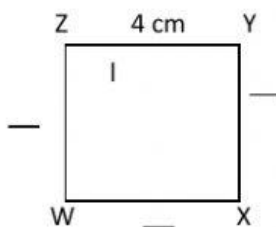

$$A = \quad = \quad = \text{ cm}^2$$

$$P = \quad = \quad = \text{ cm}$$

$$A = \quad = \quad = \text{ cm}^2$$

$$P = \quad = \quad = \text{ cm}$$

$$A = \quad = \quad = \text{ cm}^2$$

$$P = \quad = \quad = \text{ cm}$$
