

What is Wonderful About the Brain?

Inside your head is a remarkable organ, the brain. You use it to understand and remember things that (1 – to happen) around you.

The brain is soft and spongy. It (2 – to make up) of billions of tiny parts called cells. Three coats or membranes (3 – to cover) the brain. The brain sometimes (4 – to call) the busiest communication center in the world. The brain (5 – to control) your body functions and keeps all parts of your body working together. Thousands of messages from all parts of the body (6 – to send) to and from the brain.

Messages (7 – to carry) to the brain by sensory nerves. Special places, or centers, on the brain receive sensory messages from all parts of the body. When messages (8 – to receive) by centers, the brain (9 – to interpret) them.

All day long your muscles and your brain (10 – to work). By the end of the day they (11 – to be tired). Then your brain and your muscles (12 – to start) to relax. Before long, you go to sleep. As you sleep, the big muscles in your body relax

A 1) 1. are happened 2. has happened 3. happens 4. happened 5. are happening	A 2) 1. is made up 2. makes up 3. made up 4. has made up 5. had made up	A 3) 1. is covered 2. covered 3. cover 4. is being covered 5. will cover
A 4) 1. is called 2. has called 3. calls 4. called 5. will be called	A 5) 1. is controlled 2. controlled 3. controls 4. has controlled 5. is controlling	A 6) 1. send 2. are being sent 3. has sent 4. is sent 5. sent

A7) - are carried - was carried - carried - carry - have carried	A8) - receives - will be received - will receive - will have received - are received	A9) - is interpreted - interpreted - interprets - is interpreting - have interpreted
A10) - are worked - is worked - are working - have been working - worked	A11) - have be tired - are tired - are being tired - will be tired - will have been tired	A12) - are started - started - start - are starting - have started
