Name:		

Division

Sheet 1

1) A group of five friends to a local farm to pick apples. They picked 42 apples in all. How many apples will each one get, if they decided to share them equally?

2) Cheryl, a grade 1 teacher, distributes 88 pencils equally among nine children in her class. How many pencils will each child receive?

3) Samantha baked 16 chocolate cupcakes for her children. She puts them in boxes. How many boxes are needed if one box can contain 5 cupcakes?

4) 87 people want to cross the river by boat. Each boat can carry 10 people. How many boats are needed to carry all 87 people?

5) Students of grade 4 were divided into seven teams for a game of dumb charades. If the class comprises 49 students, how many teams of 10 students are there?
