

THE HUMAN BRAIN

Hello kids! Do you like to know some important parts of our brain and what they do?

Drag and drop these boxes on the diagram of the brain to know them.

CEREBRUM: The biggest part of the brain. Deals with functions like muscle movement, hearing, sight, touch, taste, speech, thinking and memorizing.

CEREBELLUM: Controls the things like maintaining the body balance, muscle tone and gait.

BRAIN STEM or MEDULLA: Controls the things you don't think about such as breathing, heartbeat, blinking and sneezing

Now let's watch a video to know more....
