

Write which is a solar eclipse and which is a lunar eclipse. Then write the names of each element.

The image contains two diagrams illustrating celestial events. The top diagram shows a solar eclipse: the Moon is positioned between the Sun and the Earth, casting a shadow on the Earth. The bottom diagram shows a lunar eclipse: the Earth is positioned between the Sun and the Moon, casting a shadow on the Moon. Each diagram includes a Sun, a Moon, and an Earth, with lines indicating the paths of light and shadows. There are several empty boxes for labeling the elements and identifying the events.

Diagram 1 (Top):

- Top box: []
- Bottom-left box: []
- Bottom-right boxes: [] []

Diagram 2 (Bottom):

- Bottom-left box: []
- Bottom-right boxes: [] []
