"Simplifying fraction"

Directions: Simply the following fractions into lowest term.

$$\frac{6}{12} = \frac{6}{12} \div \frac{6}{6} = \frac{1}{2}$$

$$1. \frac{11}{22} = \frac{11}{22} \div \text{---} = \text{---}$$

$$2. \frac{18}{27} = \frac{18}{27} \div \text{---} = \text{---}$$

$$3. \frac{30}{42} = \frac{30}{42} \div \text{---} = \text{---}$$

$$4. \frac{10}{45} = \frac{10}{45} \div \text{---} = \text{---}$$

$$5. \frac{16}{28} = \frac{16}{28} \div \text{---} = \text{---}$$
