

Calcula las siguientes sumas y resta de fracciones

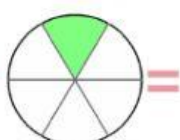

$$\frac{4}{6} + \frac{1}{6} = \frac{\square}{\square}$$

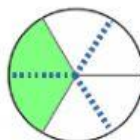

$$\frac{4}{5} - \frac{1}{5} = \frac{\square}{\square}$$

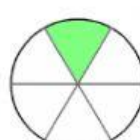

+

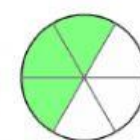

=

+

=

$$\frac{1}{3} + \frac{1}{6} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$$

+

$$\frac{1}{6} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$$

=

$$\frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$$

+

$$\frac{\square}{\square} = \frac{\square}{\square}$$

=

$$\frac{\square}{\square}$$

$$\frac{1}{2} + \frac{1}{4} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$$

$$\frac{5}{6} - \frac{1}{3} = \frac{\square}{\square} - \frac{\square}{\square} = \frac{\square}{\square}$$

$$\frac{4}{7} + \frac{3}{14} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$$

$$\frac{9}{10} - \frac{1}{5} = \frac{\square}{\square} - \frac{\square}{\square} = \frac{\square}{\square}$$
