<b>Live in</b>	on land in water	on land in water	on land in water
<b>Examples</b>	Eathworms Starfish Sponges	Snail Mussels Octopus	Insect: ant Arachnid: spider Sponges: Jellyfish

	FISH	AMPHIBIANS	REPTILES	BIRDS	MAMMALS
					
<b>Their body is covered by</b>			Dry skin and scales		Fur and hair
<b>They breathe</b>		Gills and lungs			
<b>Reproduction</b>					
<b>Vertebrate or invertebrate?</b>					

### Plant reproduction

_____ reproduction	_____ reproduction
 <p>a) _____ b) _____</p>	 <p>c) _____</p>
<p>The pollen joins an ovule to make a seed. This is called fertilisation. The pistil grows around the seed into a fruit.</p>	<p>Stems can grow along the ground. Buds grow from the stems into new plants.</p>
