Rounding to the nearest Tens and Hundreds

If the digit is 0,1, 2,3,4
the digit that's being
rounded stays the same.
Rest of the digits
becomes zero/s.

If the digit is 5, 6,7,8,
9 the digit that's being
rounded, rounds higher.
Rest of the digits
becomes zero/s.

Round the numbers to the nearest ten.

2. $\textcircled{5}\underline{3} = \underline{\hspace{2cm}}$
