

What are teenagers really like? Vocab Test.

A recent survey showed that teenagers don't sleep enough and that is why they are often 1) _____ (in a bad mood), in the morning especially. Parents think that teens are lazy and 2) _____, because they never help about the house, and aren't very 3) _____, because they never want to discuss their life with parents. On the contrary, they spend so much time online that they seem to be 4) _____ their phones. 5) _____ is not their strong side either – they are often so arrogant! And they can be extremely 6) _____ sometimes (they don't do what they have to do) and 7) _____ (they don't always understand that they hurt other people's feelings by what they do or say).

However, teens aren't all that bad, not at all. First of all, they do care about their friends, so they are very 8) _____ them: they are always 9) _____ for their friends. Secondly, it would be a mistake to call them 10) _____: teens often take risks, and, as a result, they are likely to achieve their goals and become 11) _____. And they are never 12) _____! They are interested in so many different things!

Some might argue that teens' diet is very 13) _____, with all the junk food they are so keen on, but, on the other hand, not too many of them are 14) _____, because they are often 15) _____ about sports.
