

## PERCENTAGES

How do you calculate percentages? If you got 14 out of 20 on a test, what percent would that be?

Score on test x 100 ÷ Total Marks = Percentage

$$14 \times 100 \div 20 = 70\%$$

Using your calculator, determine the percentage of each of the following...

1) 12 out of 20 = 60 %

2) 25 out of 50 = \_\_\_\_\_ %

$$12 \times 100 \div 20 = 60$$

3) 60 out of 75 = \_\_\_\_\_ %

4) 10 out of 90 = \_\_\_\_\_ %

5) 6 out of 30 = \_\_\_\_\_ %

6) 94 out of 100 = \_\_\_\_\_ %

7) 3 out of 5 = \_\_\_\_\_ %

8) 25 out of 125 = \_\_\_\_\_ %

9) 8 out of 160 = \_\_\_\_\_ %

10) 36 out of 120 = \_\_\_\_\_ %

11) 72 out of 300 = \_\_\_\_\_ %

12) 52 out of 52 = \_\_\_\_\_ %
