

PRACTICE TEST B

Read the text and circle the correct option, true (T) or false (F).

Caring professions

Anna (Nurse)

"I work in a hospital. When I arrive in the morning, I go to see my patients and give them their medicine. I help the patients to get up, to have a wash and to get dressed. But I don't serve their meals – the catering staff do that. My job can be very busy and very stressful. But because you are helping people, you feel happy and satisfied at the end of the day. In my job, you need good communication skills. It is also important to ask for help when you need it." Anna studied nursing for three years at Middlesex University.

Caroline (Teacher)

"I'm a science teacher in a secondary school. I am also responsible for all the computers and computer systems in the school. I teach science and I really love working with young people. My job can be stressful – because students always have a lot of questions about science and there are not always simple answers to give them. When the computer systems stop working, it is my job to solve the problem. That is really exciting. I am always busy. After school hours, I have a computer club for students. It's great fun, but we don't play games – it's serious stuff!" Caroline did a three-year degree course in science at university and then spent a year at a teacher training college. She designed a new website for her school last year. She hopes everyone likes using it.
