Match the cause of environmental degradation in column A to the most likely impact in column B.

Column A	Column B
Sewage discharge into a river	Death of marine species
Mining	Air pollution from dust
Heavy tourism development	Stronger hurricanes
Deforestation	Eutrophication
Quarrying	Loss of biodiversity
Coastal tourist developments	Reduced stores of groundwater
Release of industrial aerosols into the air	Loss of mangroves
Dumping of industrial effluent into the sea	Contamination of groundwater
