

Name _____ Date _____

- 1 Circle the parts of the eye. Then, label the diagram.

- 2 Find five parts of the ear in the wordsearch.

| | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| A | R | U | S | J | O | P | C | C | E |
| E | E | A | R | D | R | U | M | O | I |
| T | P | V | C | T | K | I | C | C | S |
| O | F | X | W | T | H | D | P | H | O |
| M | S | S | R | Q | O | P | I | L | P |
| S | M | A | L | L | B | O | N | E | S |
| C | H | A | D | I | N | G | N | A | K |
| N | E | A | R | C | A | N | A | L | L |

- 3 Classify the parts in the table.

epidermis *nasal cavity* *nostril* *olfactory nerve* *pore*
taste bud *tongue* *touch receptor*

| nose | mouth | skin |
|-------|-------|-------|
| _____ | _____ | _____ |
| _____ | _____ | _____ |
| _____ | _____ | _____ |

4 Circle the correct words. Then, label the parts of the skin.

The skin has two main layers. The dermis contains **taste buds / touch receptors** which detect information about the environment. These send information to our **nerves / hands** so we know how something feels. The **hypodermis / epidermis** is the outer layer of the skin. Here there are many tiny openings called **pores / nostrils** and also many **blood vessels / hairs**.

5 Circle the parts of the ear. Then, complete the sentences.

cochlea small bones ear canal pinna eardrum auditory nerve

- The _____ captures sound from the air in the form of vibrations.
The vibrations travel along the _____.
- The vibrations reach the _____. When the eardrum vibrates, it makes the three _____ vibrate too.
- When the three small bones vibrate, they make the _____ vibrate.
These vibrations are transformed into signals.
- The signals travel along the _____ to the brain.
