

FINAL WRITTEN EXAM TEENS 3 - PART I

1 | Reading comprehension: Read the article and do the activities below.

Teenagers Life: Better now or in the past?

Does this situation sound familiar?

You are arguing with your parents about something. Maybe your laptop isn't powerful enough to play video games. Or your friend's smartphone is much better than yours. Then you hear...

'When I was your age, there weren't any computers or video games. And I didn't have a mobile phone until I was 20. It was a cheap phone and it didn't have any apps.'

Technology has changed a lot. **Fifty years ago**, no one could imagine a world with tiny computers, tablets or amazing smartphones. And now these things are our most essential possessions - we can't imagine living without them! Teens spend most of their time using these electronic devices. Is this good for their bodies?

Technology **means** more time alone with our computer or video game console. Teenagers aren't as healthy as they were in the past because they don't do enough exercise. And, some people think teenagers today aren't as sociable as they were in the past.

What do you think? How is teenage life **better** these days?
