

Nom: _____ Data: _____

La fracció com a divisió no exacta

Si quan es divideix el numerador pel denominador la divisió no és exacta, la fracció equival a un nombre mixt

21 Escribe el nombre mixt que correspon a cada cas:

f.

$$\frac{7}{3} = \square \frac{\square}{\square}$$

g.

$$\frac{24}{10} = \square \frac{\square}{\square}$$

h.

$$\frac{14}{5} = \square \frac{\square}{\square}$$

23 Expressa cada grup com a fracció i com a nombre mixt.

a. Set mitges pinyes.

b. Sis quarts de meló d'Alger.

22 Fes les divisions i expressa aquestes fraccions com a nombres mixtos:

$$\frac{69}{9} = \square \frac{\square}{\square} \quad \left| \quad \frac{26}{4} = \square \frac{\square}{\square} \quad \left| \quad \frac{12}{5} = \square \frac{\square}{\square} \quad \left| \quad \frac{17}{3} = \square \frac{\square}{\square} \quad \left| \quad \frac{73}{2} = \square \frac{\square}{\square} \quad \left| \quad \frac{198}{21} = \square \frac{\square}{\square} \right.$$
