

Word	Definition	Calculate
Mean	Fair share or average	1. Add up all data 2. Divide by the # of data

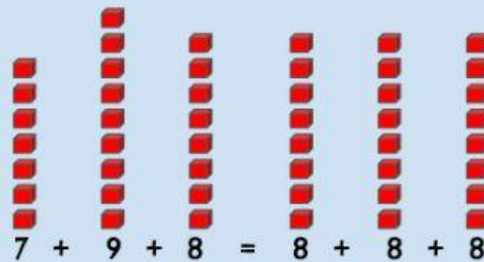

Example

What is the Mean of these numbers? 7, 9, 8

- Add the numbers: $7 + 9 + 8 = 24$
- Divide by how many numbers are in the data set (there are 3 numbers): $24 \div 3 = 8$

Why does this work?

It is because 7, 9, and 8 added together is the same as 3 lots of 8:

Word	Definition	Calculate
Mean	Fair share or average	1. Add up all data 2. Divide by the # of data

Find the Mean

What is the mean of 8, 9, 13, 18? Type your answer in the box.
