

LISTENING ROCKS ~ C1-

Tech Addiction

LISTENING GAP FILL

FIRST, START BY READING THE TEXT AND GUESSING THE MISSING WORDS. Check. Do it again another time by LISTENING to the FOLLOWING AUDIO CLIP and FILL IN THE GAPS: check again- Finally, you can express your OPINION.

Presenter: The sound of kids _____ together. Or, at least, how it sounded a few years ago. Nowadays a group of, well, just about anyone – kids, teens, tweens, their parents – might _____ a lot more like this ...

Most of us spend hours a day with our heads _____ our smartphones. Research suggests teenagers spend as many as nine hours a day, _____ pre-teens spend up to six.

Teen voice: I don't know, it's, like, the first thing I do in the morning, check in and see who's _____ anything overnight. It's my _____ so I kind of have to look at it and then, you know, it's pretty hard not to scroll through.

Presenter: And it's not just teenagers and millennials, Generation X and even the Baby Boomers are almost as bad.

Adult voice: I'm online most of the day for work and you'd think I'd be sick of screens by the time I get home, but most of my news comes through Facebook and I'm really into food so I'll hold my hands up to _____ one of those people who posts photos of their meals.

Presenter: But are we addicted to our phones and apps? And does it matter? Former Google and Facebook employees certainly think so. So they've set up a _____ - _____ organisation, the Center for Humane Technology, to reverse the digital attention crisis and _____ safe technology for children.

Expert: Anyone who's seen queues round the block for the latest iPhone has to wonder what these people are thinking. You've literally got people sleeping in the street to get the newest _____, probably not even talking to

anyone else in the queue because they're on social media, taking selfies in the queue to _____ to Instagram. If that's not _____, it's certainly _____.

Presenter: A more formal definition of addiction describes it as a _____ involvement with an activity, despite the harm it causes. Someone with an addiction has cravings – that feeling that you haven't checked your phone for two minutes and can't relax until you get your hands on it again. They may have a lack of self-control and not realise their behaviour is causing _____ – like texting while cycling or _____ off a cliff taking a selfie. And, in case you're wondering, I read about both of those via the _____ app on my phone, which _____ every couple of minutes with the latest stories ... definitely _____. So the 'Truth about Tech' _____ by Common Sense Media and the Center for Humane Technology couldn't come fast enough for most of us. But it's children who are probably most at risk because of the effect _____ might be having on their brain development. Professor Mary Michaels of the Atlanta Future Tech Institute has been working with very young children. Mary, thanks for dropping by. What is your research telling us?

Mary: Well, we know that _____ is affecting key aspects of _____ child development, like sleep, healthy eating and what psychologists call 'serve and return' moments, which are when parents respond to babies seeking assurance and connection by making _____, smiling or talking. All perfectly normal things we do and which help lay the foundations of babies' brains. It's much harder to engage with a baby normally if you're looking at your phone. Or, even worse, if parents give a crying child a phone to _____ them instead of talking to them or hugging them, and that might lead to them failing to _____ their ability to regulate their own emotions.

Presenter: And what about older children?

Mary: Again, we know that teenagers who spend a lot of time on social media are 56 per cent more likely to report being unhappy and 27 per cent more likely to suffer depression. Teenagers are especially vulnerable because they're more sensitive to highs and lows anyway, so we're looking at, potentially, higher instances of suicide, _____, anxiety

and addiction in teens which is _____ by dependence on technology.

Presenter: It sounds like a vicious circle. They're more likely to get addicted to smartphones and social media and that addiction itself makes them candidates for other addictions.

Mary: Yes, that's right.

Presenter: Time to stage an _____! Is there anything we can do to make tech less addictive?

Mary: Setting devices to _____, which is basically black and white, might make them less _____. Scrolling through a newsfeed of boring, washed-out photos just doesn't create the same rush as bright colours perhaps. And you can turn off the _____ that are constantly pulling you back in to check your phone.

Presenter: So is it ...

Exacerbate : make (a problem, bad situation, or negative feeling) worse.

TASK: MATCH THE DEFINITIONS

Vocabulary

1. to scroll
2. to class
3. greyscale
4. vulnerable
5. to drop by
