

1. Match the words with the picture
The Geosphere

CORE

CRUST

MANTLE

2. Minerals have different properties. Put the definitions in the correct place.

colour

hardness

lustre

shape

Resistance to
being scratched

That mineral is
yellow

The shape. For
example, this
mineral is cubic.

How the surface
reflects light

3. Match the words with the correct sentence.

hard

- The softest minerals are easy to

talc

- If the surface is difficult to scratch, the mineral is

scratch

- is the softest mineral.

diamond

- is the hardest mineral.

weigh

- Minerals that contain metals more.

4 Listen and complete. Drag the correct answers

	shape	lustre	colour	streak	hardness
diamond					
quartz					
turquoise					
pyrite					

crystal	glassy	transparent	greenish black	white
crystal	metallic	irregular	dark yellow	crystal
opaque	blue-green	6	7	white
many colours	bluish white	5-6	10	glassy
