

Data Analysis (SP)

Worksheet – Biology

Name: _____

Water Depth (meters)	Temperature (°C)
50	18
75	15
100	12
150	5
200	4

The water temperature at 150 meters is ____ degrees Celsius.

Water temperature is ____ degrees Celsius at 50 meters deep.

The water temperature is 4 degrees Celsius at ____ meters deep.

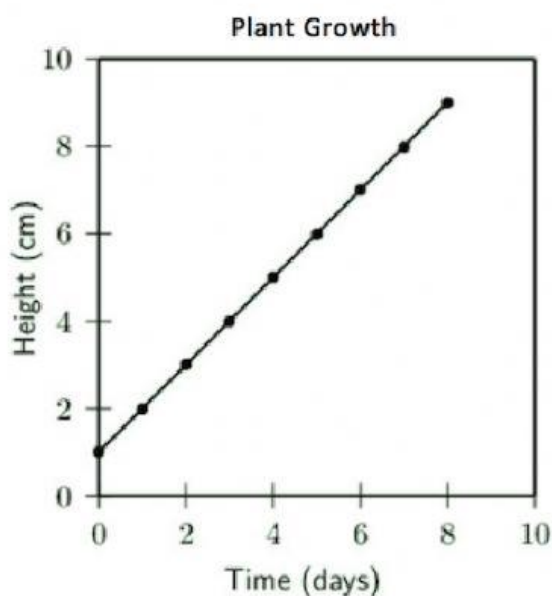

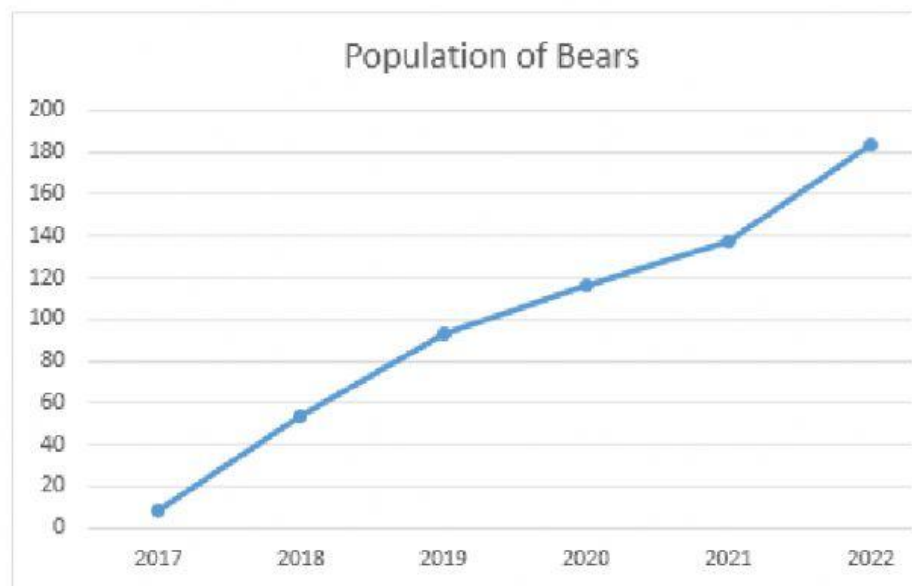

The point of this table is probably to show that water temperature _____ as the water gets deeper (increases or decreases).

This is probably because there's _____ sunlight available as the water gets deeper (more or less).

In 2017, the population of bears was approximately ____ bears.

In 2020, the population of bears was approximately ____ bears.

This population of bears is _____ over time (increasing or decreasing).

The plants started at a height of ____ cm and ended at a height of ____ cm.

On Day 6, the plants were approximately ____ cm tall.

The height of the plants _____ over time (increased or decreased).
