How I beat my negative thoughts
by Duncan Ashworth

On 7 July 2012 I was in a car accident. I injured my back. (1) ____ Before my accident, I was a really active person, I played tennis and I went swimming every week. I had a busy social life and a job as a lawyer. All that changed after my accident. I had to learn to walk again. (2) ____ It was easy for me to slip into depression. The one thing I could still do was use my laptop. So, I started writing a diary to reflect on my feelings and what I should do to feel better. I discovered there were quite a few things I could do to cheer myself up.

One of the things that really made me feel bad were my thoughts about the past and the future. I used to think, 'If I hadn't been in the accident, I wouldn't be stuck in this hospital bed. If my back doesn't get better, I'll never walk again. Why did I drive to work that day?' (3) ____ So, I decided that every time I had a thought like that, I would instantly replace it with something positive. I also focused on the present moment rather than the past or the future. I used a meditation technique that I learned. It involved focusing on my breathing and controlling it for a few minutes, then making an assessment about how I was feeling and what thoughts were going through my mind at that moment. If I felt stressed, I would check my body to find out exactly where I felt stressed; for example, a tightness in my chest, or a pain in my stomach, or tension in my neck. I would then breathe slowly, focus on that part of my body and try to imagine it was relaxing and all the stress and tension was flowing out of my body. This technique helped me a lot.

Another thing that helped me a lot was laughter. I watched a lot of comedy films that made me laugh. I also had a very entertaining roommate in the hospital. He was a young man called Ian and he was around my age. He had broken a lot of bones in a motorcycle accident. Despite what he was going through, he never lost his sense of humour. He made me laugh and this helped me get through those difficult first months. Another thing that helped me was being grateful. At the end of every day I made a list of ten things I was grateful for; it could be about the weather, something I achieved or just the simple pleasure of eating a bar of chocolate.

(4) ____

Everyone knows that exercise is good for your well-being, but after my accident I couldn't work out in the gym like I used to. Instead, I did gentle exercises and stretches and practised walking very slowly. The fact that I was doing something helped improve my mood. After six months I was almost fully recovered. I went home and, eventually, back to my job. But something had changed inside me.

I felt stronger as a person. I felt more able to cope with difficulties and challenges. I have no regrets about what happened to me. I believe that if I hadn't been in that accident, I wouldn't have learned so much about myself and about how staying positive about what life can throw at you is essential.

10 Read the text again. Then complete the sentences.

- 1 At first, Duncan _____ negative thoughts about what _____ to him that day.

- 2 Duncan liked his _____ Ian very much because Ian _____
Duncan _____.
- 3 Duncan doesn't regret the accident. As a result of what happened to him, he felt
_____. He also thinks it is _____ to stay
_____.
