

# The Solar System

Drag and drop the words in the word bank provided to label the picture.

Jupiter      Mars      Neptune      Earth      Saturn      Uranus      The Sun

outer space      Venus      The Milky Way      Mercury

Match each planet with the information about it.

|         |
|---------|
| Mercury |
| Venus   |
| Earth   |
| Mars    |
| Jupiter |
| Saturn  |
| Unanus  |
| Neptune |

|                                                                                      |
|--------------------------------------------------------------------------------------|
| is the largest planet.                                                               |
| has rings of rock and ice.                                                           |
| is the furthest planet from the sun.                                                 |
| is the coldest planet.                                                               |
| is also called the Red planet.                                                       |
| is the second closest planet to the Sun and the closest to Earth. It is the hottest. |
| is the only planet where live exists.                                                |
| is the closest planet to the Sun.                                                    |
