Il perimetro

- Collega con una linea ogni poligono alla giusta formula per il calcolo del suo perimetro.

$P = \ell \times 4$

$P = \ell_1 + \ell_2 + \ell_3$

$P = (b + h) \times 2$

$P = \ell \times 5$

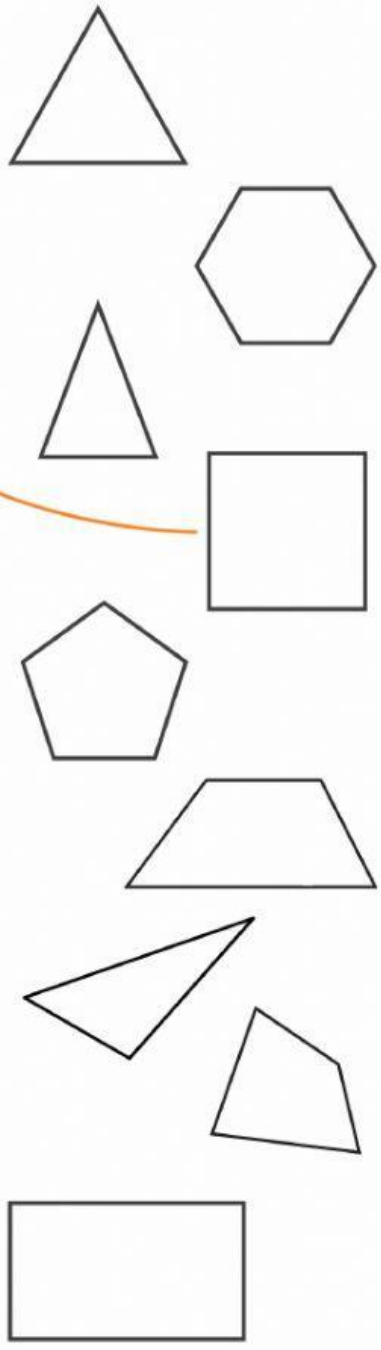

$P = \ell_1 + \ell_2 + \ell_3 + \ell_4$

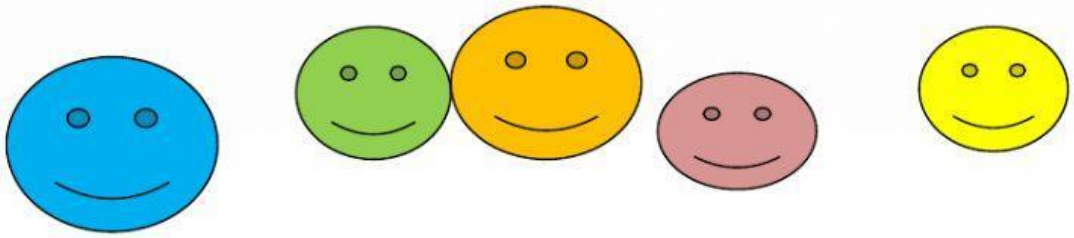

$P = (\ell \times 2) + b$

$P = \ell \times 3$

$P = B + b + \ell_1 + \ell_2$

$P = \ell \times 6$

L'area

- Collega con una linea ogni poligono alla giusta formula per il calcolo della sua area.

$A = (D \times d) : 2$

$A = b \times h$

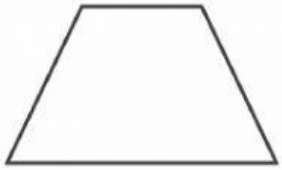

$A = (b \times h) : 2$

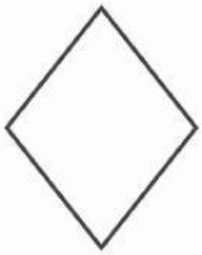

$A = \ell \times \ell$

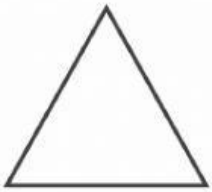

$A = b \times h$

$A = [(B + b) \times h] : 2$
