I enjoyed business studies at school and wanted to \_\_\_\_\_ my knowledge of the subject so I decided to study it at university. Also I knew it would be later when I looked for a job. At first, the course wasn't quite what I had expected because it didn't cover the subjects I was particularly interested

We spent lots of time studying a range of subjects like law and economics but I soon \_\_\_\_\_ these are things you need to understand.

In class we work in groups, preparing ideas, we then \_\_\_\_\_ them with the others. Now we are learning how to make business plans and we can see how they would actually apply to the world of business. We have a very busy life at the university so whatever subject you study, you must be \_\_\_\_\_ on it or you won't make yourself find the time to study.
