Right, planning Plan your study in chunks, with regular breaks.
Many people half and hour of study than a ten break.
But, you can this to suit you. If you study for too long at the stretch your
mind will work less So be in your short breaks you can five
a trait such as a cup of green tea I wouldn't a chocolate bar as a
trait, a sugar is not great for concentration.
Ok so next think about what you do you're studying. Some people
just read the notes or text books and in pencil or
important bits. If this works for you, fine. But I that is better to
notes of some kind so your is the information more, this way you'll also be producing material which will be for last minute revision. I
don't recommend very last minute revision but we'll come back to that
