

Name: _____

Date: _____

Sequence: Steps in a Process

Read the steps that tell how to make play clay.

You can make your own 'play clay.' First put $\frac{3}{4}$ cups of salt and $1\frac{1}{2}$ cups of flour into a bowl. Next, put a few drops of food coloring into $\frac{3}{4}$ cup of water. Pour the water into the bowl. Last, mash everything together with your hands until it feels like clay. Add more flour if the clay is sticky. Now you can play with your clay!

Write the numbers 1, 2, 3 and 4 to show the order.

_____ Play with your play clay.

_____ Put salt and flour in a bowl.

_____ Mash everything together.

_____ Put food coloring in water.
