

## Observation sheet – Experiment Water pollution

Drag and label the samples you have collected.

Water sample 1	Water sample 2	
		<div>Clear water</div>
		<div>Water with powder/glitter</div>

What did you notice about the water you collected after adding the glitter? Drag and drop the correct option.

It is still very clean and clear.

It is dirty and harmful.

Why do you think the water became dirty and harmful?

because I like colourful water

because I added glitter/powder

What does this tell us about how chemicals get in the ocean?

are sprayed on the ground. The  washes the chemicals over the  into the .
