Fiserv is one of the world's largest of payments technology and financial services technology and solutions. Our _____ is to move money and information in a way that moves the world. There's such an _____ for banks to _____ the gold mine of data that they're sitting on - customers, their financial patterns - for purposes of everything from credit risk management to cross-selling recommendations, next-best action, risk of _____.

So, we're really excited to see how Microsoft is incorporating artificial _____ and _____ services into the Dynamics platform. We see a great opportunity to _____ the solution set on Dynamics. To leverage the platform. To automate and improve many different workloads that banks have today; not just related to sales and sales _____. Everything from account origination, _____ management automation, commercial _____ origination all using the Power Apps platform and the Dynamics 365 platform.

We've been working with the Dynamics data model as the _____ of our solution for almost 10 years now, making it fit in a banking context. We're excited that Microsoft is releasing the Common Data Model for banking. We think it gives us a common language when dealing with other partners and clients and a _____ from which we can build to focus on our _____ around the functionality the banks need in _____ and _____ banking. We also think that the Common Data Model for banking gives us a better opportunity to work with other Dynamics partners who have solutions that are _____ to ours.

To the _____ that they're using the same language, the same data structures and _____. That makes it a lot easier for us to _____ our solutions into theirs and vice _____. With Fiserv and Microsoft together, banks are able to leverage the best of the _____ of Microsoft Dynamics 365 in a way that's already suited and fitted to their business.
