School

Outline

A school is an educational institution designed to provide learning spaces and learning environments for the teaching of students under the direction of teachers. Most countries have systems of formal education. In home schooling and online schools, teaching and learning take place outside a traditional school building. Schools are commonly organized in several different organizational models, including departmental, small learning communities, academies, integrated, and schools within a school.

Many schools are owned or funded by states. Private schools operate independently from the government. Private schools usually rely on fees from families whose children attend the school for funding; however, sometimes such schools also receive government support (for example, through School vouchers). Many private schools are affiliated with a particular religion; these are known as parochial schools.

It is important take into account that in order to get a better job than others people need to be preparing constantly. For example: if some person take in advantage the school preparation during the whole time in order to have a profession, that person can get a job to help himself and also to help their family, talking about the economy aspect.

The essential part in this topic is there are different levels in which we can be preparing and help us in order to have an opportunity to get a good job and also to manage different aspects and situation that we can face during the whole life.

"Work hard, Dream Big, and Never give up"

Mr. Gutierrez
